The fontawesome package High quality web icons

Xavier Danaux*((A)TEX code)
Dave Gandy†(font design)

Version 4.4.0, released on July 30, 2015

Abstract

The fontawesome package grants access to 585 web-related icons provided by the included *Font Awesome* font, designed by Dave Gandy and released under the open SIL Open Font License.

This package works both with $X_{\overline{A}}(\underline{\mathbb{A}})T_{\underline{P}}X$ and $\underline{\text{Lua}}(\underline{\mathbb{A}})T_{\underline{P}}X$ (using fontspec to load the included original off font), as well as $(pdf)(\underline{\mathbb{A}})T_{\underline{P}}X$ (using an included type1 conversion and character mapping of the font).

1 Introduction

The fontawesome package aims to enable easy access in (A)TeX to high quality icons covering web application, transportation, gender, file type, spinner, form control, payment, chart, currency, text editor, directional, video player, brand and medical pictograms. It is a redistribution of the free (as in beer) Font Awesome font with specific bindings for (A)TeX.

2 Requirements

The fontawesome package requires the fontspec package when using the $X_{\overline{A}}(A)T_{E}X$ or Lua(A)T_EX engines to load the included off font. When using the (pdf)(A)T_EX engine, the fontawesome package doesn't require any external package.

 $^{^{\}dagger} \text{URL}.$ fontawesome.io; Licence: SIL Open Font License, version 1.1.

3 Usage

\faicon

Once the fontawesome package loaded, icons can be accessed through the general $\fint \fint \fi$

3.1 Web application icons
